Education

University of Delaware *Newark, DE*

Ph.D. in Computer Engineering *Sep 2015 - Dec 2022*

- Advisor: Dr. Chase Cotton and Dr. Haining Wang

University of Science and Technology of China *Hefei, Anhui, China*

M.S. in Techniques and Applications of Synchrotron Radiation *Aug 2012 — Jun 2015*

- Advisor: Dr. Yangchao Tian and Dr. Gang Liu

University of Science and Technology of China *Hefei, Anhui, China*

B.S. in Mechanical engineering and Automation *Sep 2008 — Jun 2012*

- Undergrad research advisor: Dr. Yangchao Tian

Professional Experience

2023 - Now	**Technical Program Committee member**, IEEE SM'23
2023 - Now	**Technical Program Committee member**, ICDATE 2023
2023 - Now	**Technical Program Committee member**, BalkanCom'23
2023 - Now	**Technical Program Committee member**, IEEE ICECIE'20233
2022 - Now	**Data Scientist**, Expatiate Communications
2015-2022	**Research Assistant**, University of Delaware
2016-2022	**Teaching Assistant**, University of Delaware
2021-2021	**Software Engineer Intern**, EPS Online INC
2012-2015	**Graduate Research Assistant**, University of Science and Technology of China
2011-2012	**Undergraduate Research Assistant**, University of Science and Technology of China
2011-2011	**Research Intern**, Institute of Optics, Fine Mechanics and Physics, Chinese Academy of Sciences

Teaching Experience

Fall 22	**System Hardening and Protection**, Teaching Assistant	*Newark, DE*
Spring 22	**Introduction to Cybersecurity**, Teaching Assistant	*Newark, DE*
Fall 21	**System Hardening and Protection**, Teaching Assistant	*Newark, DE*
Spring 21	**Introduction to Cybersecurity**, Teaching Assistant	*Newark, DE*
Fall 20	**Advanced Cybersecurity**, Teaching Assistant	*Newark, DE*
Summer 20	**USCC summer camp in Delaware**, Teaching Assistant	*Newark, DE*
Spring 20	**Introduction to Cybersecurity**, Teaching Assistant	*Newark, DE*
Fall 19	**Advanced Cybersecurity**, Teaching Assistant	*Newark, DE*
Spring 19	**Web Application Security**, Teaching Assistant	*Newark, DE*
Fall 18	**Advanced Cybersecurity**, Teaching Assistant	*Newark, DE*
Spring 18	**System Hardening and Protection**, Teaching Assistant	*Newark, DE*
Fall 17	**Introduction to Cybersecurity** , Teaching Assistant	*Newark, DE*
Spring 17	**ECE Design Challenges**, Teaching Assistant	*Newark, DE*
Fall 16	**Introduction to Network Security**, Teaching Assistant	*Newark, DE*

Research Experience

Project: Detect and analyze vulnerable transparent proxies *Newark, DE*

University of Delaware, Collaborate with ODU and Virginia Tech *Aug 2020 — Sep 2022*

- Utilized a globally distributed proxy platform to detect HTTP interceptions caused by transparent proxies
- Studied the characteristics of transparent proxies from various aspects – geographically and AS level distribution, server hosting, software and services
- Characterized and analyzed vulnerable transparent proxies that might suffer cache poison attacks
- Tools: Python, Bash, API, HTTP, ProxyRack

Project: Understanding Open Proxy Ecosystem *Newark, DE*

University of Delaware, Collaborate with ODU and Virginia Tech *Jan 2019 — Jul 2020*

- Conducted a large-scale study on over 436 thousand identified proxies, including 104 thousand responsive proxies in nine months.
- Identified that 7.17% of responsive proxies modify the page content, and 76.42% of those proxies perform malicious actions
- Analyzed two particular groups of open proxies—cloud-based proxies and long-term proxies
- Tools: Python, Bash, Web crawler, API, HTML, Ping, TraceRoute, Curl

Project: Passive analysis of anycast in global routing: Unintended impact of remote peering *Newark, DE*

University of Delaware, Collaborate with UCSD CAIDA *Jul 2017 — Dec 2018*

- Invented an alternative approach to characterize anycast based on previously collected global BGP routing information and achieved 90% accuracy in detecting anycast prefixes
- proved that anycast routing has been entangled with the increased adoption of remote peering and observed that at least 19.2% of anycast prefixes have been potentially impacted by remote peering
- Tools: Python, Bash, BGP, RIPE Atlas, RouteViews, BGPStream, machine learning, routing, TraceRoute, Ping

Project: Revisiting the Cloud Network Management on Amazon EC2 *Newark, DE*

University of Delaware *Sep 2015 — Dec 2015*

- Used EC2 as a case study to explore how the instances communicate within EC2 and how the instances communicate with the internet outside the EC2
- Confirmed that Amazon EC2 enhanced security managements including hiding routing information, isolating DNS servers and set VPC as default configurations of instances
- tools: Python, AWS, Bash, Nmap, Zmap, Ping, TraceRoute, Microsoft Office

Project: Ultralong focal length microlens array fabricated based on SU-8 photoresist *Hefei, Anhui, China*

University of Science and Technology of China *Sep 2012 — Jun 2015*

- Proposed a novel method to fabricate ultralong focal length microlens arrays based on SU-8 photoresist. The longest focal length was up to 4.4 mm from the microlens of 210 μm width
- Studied and validate the formation mechanism by simulation based on the finite element method
- Tools: Matlab, C, ANSYS, Surface Evolver, Finite element method, Photolithography, OriginLab

Project: Reconstruction of limited-angle and few-view nano-CT image via TV iterative reconstruction *Hefei, Anhui, China*

University of Science and Technology of China *Sep 2011 — Sep 2013*

- Acquire nano-CT images with high quality by using conventional Fourier reconstruction methods based on limited-angle or few-view projections and utilized the total variation (TV) iterative reconstruction to carry out numerical images and nano-CT image reconstruction with limited-angle and few-view data
- Tools: Matlab, C, OriginLab, image processing, Microsoft Office

Project: Research of CT reconstruction FBP algorithm based on Compressive Sensing *Hefei, Anhui, China*

University of Science and Technology of China *Sep 2011 — Sep 2012*

- Utilize Compressing sensing technology to enhance CT reconstruction Filtered Back-Projection (FBP) algorithm
- Tools: Matlab, C, OriginLab, Photo processing, Compressing sensing, Microsoft Office

Research Intern *Changchun, Jilin, China*

Institute of Optics, Fine Mechanics and Physics, Chinese Academy of Sciences *Jul 2011 — Sep 2011*

- Utilize C, Matlab and ANSYS to analyze Thirty Meters Telescope (TMT)'s support structure with finite element method (FEM)
- tools: C, Matlab, ANSYS, OriginLab, Microsoft Office

Mentoring

2014-2015	**Yue Hu**, Undergraduate Student, University of Science and Technology of China	*Anhui, China*
2019-2021	**Dan Goodman**, Master Student, University of Delaware	*Newark, DE*

Awards, Fellowships, & Grants

2017	**SANS CyberStart scholarship, ranking of 44 out of 3,935 people**, USCC
2010	**Outstanding Student Scholarship**, University of Science and Technology of China
2009	**Best annual report in Student journalists association**, University of Science and Technology of China
2008	**Outstanding Freshman Scholarship**, University of Science and Technology of China
